This Agreement is entered into between HEALTHSPIRE and Haroon Medical Center for provision implementation and ongoing support of the Hospital Management Software Offline as outlined in this document.

MODULES

- OPD/ER Prescription Slips
- Consultants' Invoices
- Lab Invoices
- Radiology Invoices
- Procedure Invoices/Bill

The HEALTHSPIRE is selling its Hospital Management Software Offline to Haroon Medical Center. The total price is PKR 100,000 (One Hundred Thousand Only)

TIME LINE

The Company will deliver and fully install the Hospital Management Software Offline at Haroon Medical Center within 25 working days from the date of this agreement.

L OPD/ER Prescription Slips

This module streamlines outpatient and emergency encounters by generating digital prescription slips. It captures patient vitals, clinical notes, and medication orders in real-time. By automating the documentation process, it ensures legible, accurate instructions for patients while maintaining a searchable electronic history for future follow-ups and continuity of care.

2. Consultants' Invoices

Dedicated to managing professional fees, this module automates the billing process for specialist consultations. It tracks visit types, duration, and specific consultant rates to generate accurate invoices. The system ensures seamless financial reconciliation between the hospital and visiting doctors while providing patients with clear, itemized breakdowns of professional charges.

Powering the Future of Care

3. Lab Invoices

This focused billing component generates precise invoices for clinical laboratory tests. It pulls data directly from test orders to calculate costs based on the hospital's price list, including any applicable discounts or insurance co-pays. The module ensures financial transparency and accelerates the checkout process for patients undergoing diagnostic testing.

4. Radiology Invoices

Designed specifically for imaging services, this module handles billing for X-rays, MRIs, CT scans, and ultrasounds. It automatically links procedure codes to departmental pricing, ensuring that every scan is accurately billed. The system manages complex diagnostic pricing and provides patients with professional, itemized receipts for their imaging appointments.

5. Procedure Invoices/Bill

This module manages the financial documentation for medical procedures, ranging from minor dressings to complex surgeries. It aggregates costs for the procedure itself, equipment usage, and facility fees into a single, comprehensive bill. This ensures all surgical or clinical interventions are captured accurately for revenue cycle management and patient clarity.

Note:

Health Spire (Pvt) Ltd is bound to provide all the mention software modules only other than these modules will be deal separately.
